Policy Title: AUTOMATED EXTERNAL DEFIBILLATORS

Code: 703.6

The Lapwai School District Board of Trustees recognizes the need to make Automatic External Defibrillators (AEDs) available in its buildings. Early access defibrillation has been recognized as a significant factor in the survival from incidents of sudden cardiac arrest. Therefore, it is the policy of the District that the implementation and use of AEDs is authorized in the buildings of the District in accordance with Idaho Code §5-337.

The Superintendent shall assign the High School Principal and Athletic Director as AED Team Coordinators. The Superintendent and AED Team Coordinators will request athletic coaches to be part of the AED Team. The AED Team shall work with the District to implement and maintain the AED program.

The Superintendent shall work with the AED Team to develop a program with procedures governing the use of the AEDs within the District.

Employees will be authorized to utilize an AED only after successfully completing initial and recurrent training courses approved by the American Heart Association for AEDs and CPR. The District will provide American Heart Association AED training for employees deemed to require such training by the AED Team or Superintendent. Employees who are certified will be designated as authorized users after a review of their credentials and approval by the school.

Requirements for the frequency of recurrent training will be as specified by the issuing organization of the individual employees' certification. Acceptable certification will consist of completion of an American Heart Association AED and CPR course.
