RESILIENCE

THE BIOLOGY OF STRESS & THE SCIENCE OF HOPE

FOLLOW-UP TO PAPER TIGERS:

A DEEPER UNDERSTANDING ADVERSE CHILDHOOD EXPERIENCES

This film traces the developments in the field, featuring two of the doctors who pioneered this work and the health care professionals that are running the evidence. A simple survey initiates the discussion and provides the basis for a new understanding of what our culture is facing and how to best treat families dealing with "toxic stress." Animation and well-placed statistics punctuate the thoughtful film's message that, now armed with this information, we can act quickly to mitigate the effects of a public health crisis.
